

# Gift Adviser (Gifter)

## Description

When occasions occur we sometimes have difficulties choosing an appropriate gift. With the help of your chatbot, you will be able to help and guide people to find the perfect gift for their special person.

To build your bot you will need to build several scenarios that may take into consideration some of the suggested variables below to be able to suggest one or more suitable gifts to be bought.

## Plausible Variables:

The chatbot may investigate user's preference and ask about:

- Gender
- Age
- Budget
- Occasion (birthday, anniversary, baby shower, wedding gift, graduation)
- Hobbies/interests (reading, drawing, music, sports, gaming, electronics, jewelry)
- Personality (outgoing (extroverts), introverts, sporty, girly, boyish, serious, goofy)
- Etc...

The chatbot should be capable of suggesting an appropriate gift for the user to buy.

## Evaluation

Your chat bot will be evaluated based on the following:

1. Having a consistent persona
2. Its friendliness and appeal
3. Number of significant scenarios covered
4. Ideas for future improvement or monetization
